

Lidget Green Primary School – Progression in Multiplication 2016

Year group	Objective	Method	Practical methods	Pictorial/written methods	Vocabulary	Mental recall
EYFS	Repeated grouping Counting in pairs Doubling	Practical / recorded using ICT (eg digital photos / pictures on IWB)	Toys, Beads, Rhymes, Counters, objects, number lines, stories, role play, number lines- hopping on  Counting pairs	Drawings of problems  Begin to record using marks they can explain 	Double, pair, twos, fives, tens, group, set	Chanting of counting in 2s and 10s

<p>Y1</p>	<p>Consolidation of EYFS</p> <p>Begin to understand multiplication through grouping small quantities,</p> <p>Solve one-step problems involving multiplication</p> <p>Make connections between arrays and number patterns</p> <p>Double numbers and quantities</p> <p>Count in multiples of twos, fives and tens</p>	<p>Practical / recorded using ICT</p> <p>Informal written methods</p> <p>Horizontal recording</p>	<p>long number lines, tapes, 100 square, counting sticks, Dienes, coins, cubes, bead strings, peg boards</p>  <p>counting on in groups of...</p>   <p>counting groups of objects</p>  <p>arranging objects in arrays</p>	<p>Pictures to represent working out</p>  <p>Jumps along a number line in 2s</p> 	<p>As previous.</p> <p>Count on in..., lots of, groups of pattern,</p>	<p>Consolidation of EYFS</p> <p>Chanting of counting in 2s, 5s 10s</p> <p>Double pairs to 10, then 20</p>
-----------	---	---	---	---	--	---

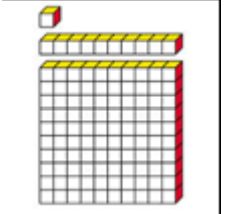

<p>Y2</p>	<p>Consolidation of Y1</p> <p>Count in steps of 2, 3, and 5 from 0, and in 10s from any number, forward and backward</p> <p>Recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</p> <p>Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (x) and equals (=) signs</p> <p>Show that multiplication of two numbers can be done in any order (<b>commutativity</b>)</p> <p>Solve problems involving multiplication using materials, arrays, repeated addition, mental methods, and multiplication facts, including problems in contexts.</p> <p>Connect the 10 x multiplication table to place value</p> <p>Relate multiplication to grouping discrete and continuous quantities, to arrays and to repeated addition.</p> <p>Use <b>commutativity</b> and inverse relations to develop multiplicative reasoning (for example, <math>4 \times 5 = 20</math> and <math>20 \div 5 = 4</math>).</p>	<p>Practical</p> <p>Informal written methods</p> <p>Horizontal recording</p>	<p>Counting sticks, bead strings, number lines, 100 squares, Dienes, objects in groups and arrays</p>  <p>Counting groups of...</p> <table border="1" data-bbox="685 355 904 571"> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>2</td><td>4</td><td>6</td><td>8</td><td>10</td><td>12</td><td>14</td><td>16</td><td>18</td><td>20</td></tr> <tr><td>3</td><td>6</td><td>9</td><td>12</td><td>15</td><td>18</td><td>21</td><td>24</td><td>27</td><td>30</td></tr> <tr><td>4</td><td>8</td><td>12</td><td>16</td><td>20</td><td>24</td><td>28</td><td>32</td><td>36</td><td>40</td></tr> <tr><td>5</td><td>10</td><td>15</td><td>20</td><td>25</td><td>30</td><td>35</td><td>40</td><td>45</td><td>50</td></tr> <tr><td>6</td><td>12</td><td>18</td><td>24</td><td>30</td><td>36</td><td>42</td><td>48</td><td>54</td><td>60</td></tr> <tr><td>7</td><td>14</td><td>21</td><td>28</td><td>35</td><td>42</td><td>49</td><td>56</td><td>63</td><td>70</td></tr> <tr><td>8</td><td>16</td><td>24</td><td>32</td><td>40</td><td>48</td><td>56</td><td>64</td><td>72</td><td>80</td></tr> <tr><td>9</td><td>18</td><td>27</td><td>36</td><td>45</td><td>54</td><td>63</td><td>72</td><td>81</td><td>90</td></tr> <tr><td>10</td><td>20</td><td>30</td><td>40</td><td>50</td><td>60</td><td>70</td><td>80</td><td>90</td><td>100</td></tr> </table> <p>Counting on in...</p>  <p>Arranging objects in arrays</p>	1	2	3	4	5	6	7	8	9	10	2	4	6	8	10	12	14	16	18	20	3	6	9	12	15	18	21	24	27	30	4	8	12	16	20	24	28	32	36	40	5	10	15	20	25	30	35	40	45	50	6	12	18	24	30	36	42	48	54	60	7	14	21	28	35	42	49	56	63	70	8	16	24	32	40	48	56	64	72	80	9	18	27	36	45	54	63	72	81	90	10	20	30	40	50	60	70	80	90	100	<p>Arrays</p>  <p>Repeated addition in groups</p>  <p>Horizontal recording as repeat addition and using x and =</p> <p><math>2 \times 5 = 10</math></p>  <p>“Multiplying 2 is like adding lots of 2’s.”</p> <p>Multiplying by 10 using place value</p> <table border="1" data-bbox="1263 1043 1547 1158"> <thead> <tr> <th>Tens</th> <th>Units</th> </tr> </thead> <tbody> <tr> <td></td> <td>8</td> </tr> <tr> <td>8</td> <td>0</td> </tr> </tbody> </table>	Tens	Units		8	8	0	<p>As previous.</p> <p>odd, even, every other, how many times, multiple of, sequence, times, multiply, multiplied by, multiple of, once, twice, three times, four times, five times... ten times... as (big, long, wide and so on), repeated addition, array, row, column, double</p>	<p>Consolidation of Y1</p> <p>Count in steps of 2, 3, and 5 from 0, and in 10s from any number, forward and backward</p> <p>Recall and use multiplication facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</p>

------------------	---	---	---	--	---	---

**Glossary:**

**Commutativity:** can be done in any order:  $3 \times 5 = 5 \times 3$ . Multiplication and addition are commutative. Subtraction and division are not.

A scaling model is also used to compare two numbers or amounts involving phrases such as 'so many times as much (or as many)'

**Correspondence:** If you know a fact for one object, this can be used to find further facts, e.g. 1 sandwich costs £2, so 4 sandwiches cost £8

**Associativity:** The property that if the same operation is applied to the same numbers, the answer will be the same.

Addition is associative, e.g.  $1 + (2 + 3) = (1 + 2) + 3$ .

Multiplication is associative, e.g.  $1 \times (2 \times 3) = (1 \times 2) \times 3$ .

Subtraction and division are not associative because, as counter examples,  $1 - (2 - 3) \neq (1 - 2) - 3$  and  $1 \div (2 \div 3) \neq (1 \div 2) \div 3$ .

We can use the associative law to help with multiplication calculations. For example: Find  $5 \times 26$ :

Factorise 26 as  $13 \times 2$ , so we now have  $13 \times 2 \times 5$ . Use the associative law to associate the 2 with the five, rather than with the 13 in order to make the calculation easier.  $(13 \times 2) \times 5 = 13 \times (2 \times 5) = 13 \times 10 = 130$ .

**Distributive law:** The property that you will get the same answer when you: multiply a number by a group of numbers added together, or do each multiplication separately then add them, eg  $3 \times (2 + 4)$  is the same as  $(3 \times 2) + (3 \times 4)$
